Description

Success with Servant Leadership involves engaging and inspiring people to do their best work and to achieve common goals. Servant Leadership is a model that encourages formal leaders to start with the drive to serve followers, customers and other stakeholders.

Target Audience

This engaging program helps **supervisors, managers and senior executives** learn how to use the servant leadership model to generate organizational success while avoiding some of the common pitfalls that can come from adopting the model.

Methodology

Rich in case studies, engaging table work, group discussions, self-assessment and skills practice, this program will give participants a thorough understanding of how to apply SL concepts in their daily work to drive individual and organizational performance to new heights while maintaining a culture of accountability and results-orientation.
